

COVID-19 RESPONSE

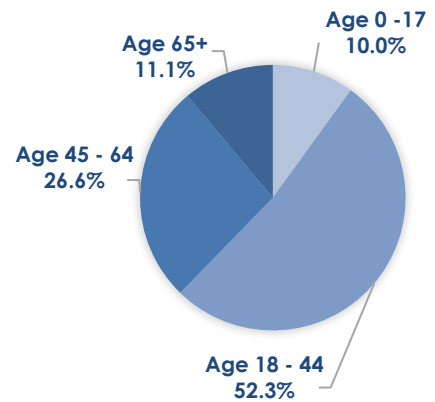

SURVEILLANCE REPORT: SEPTEMBER 6-12, 2020

Overview

- California's county risk level system has Stanislaus County in Tier 1: Widespread.
- Testing positivity and case rates have decreased compared to the previous week, and age distribution remains constant.

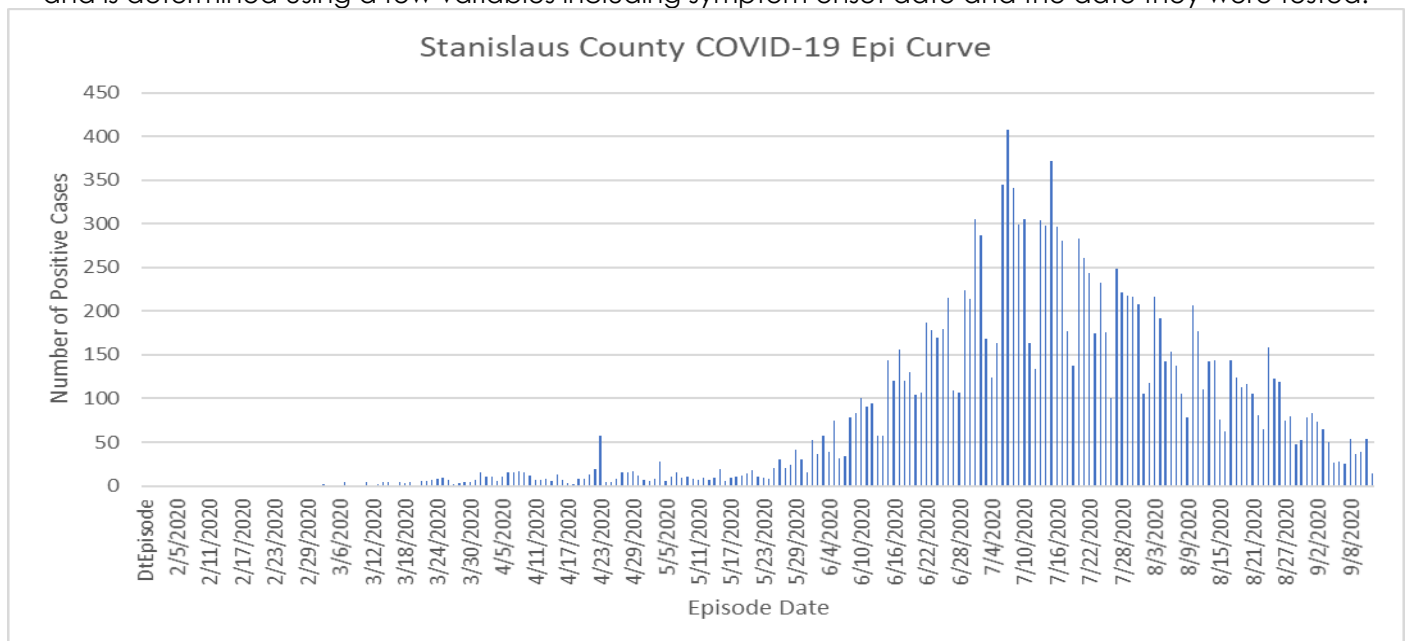

New Positive Cases	Report Week			Total		
	Count	%	Rate*	Count	%	Rate*
Age 0-17	36	10.0%	0.24	1,589	10.0%	10.64
Age 18-44	177	49.2%	0.85	8,310	52.3%	39.67
Age 45-64	94	26.1%	0.73	4,229	26.6%	32.75
Age 65+	53	14.7%	0.71	1,766	11.1%	23.75
TOTAL	360	-	-	15,894	-	-
Total Tests Reported	8,839			151,385		
Deaths	6	-	-	326	-	-

CASE % BY AGE GROUP

*Rate per 1,000 population; Data Source: California Department of Finance

This graph shows the daily number of unique COVID-19 positive cases reported among Stanislaus County residents by the case's episode date. The episode date is the earliest date a person is known to have the virus and is determined using a few variables including symptom onset date and the date they were tested.

Note: Due to delays in specimen processing, totals for the past two weeks may be incomplete.

Reported COVID-19 cases and deaths on this page are those that have been confirmed by Stanislaus County Public Health.

COUNTY RISK LEVEL

The State of California changed county monitoring strategies as of August 30, 2020. Below are the standard categories as well as the current ratings for Stanislaus County.

	Stanislaus (as of 9/14/20 for week ending 9/05/20)	Higher Risk —————> Lower Risk Of Community Disease Transmission			
	Widespread	Widespread Tier 1	Substantial Tier 2	Moderate Tier 3	Minimal Tier 4
Measure*					
Adjusted Case Rate for Tier Assignment** (Rate per 100,000 excluding prison cases, 7 day average with 7 day lag)	9.4	>7	4-7	1-3.9	<1
Testing Positivity*** (Excluding prison cases, 7 day average with 7 day lag)	5.6%	>8%	5-8%	2-4.9%	<2%

*To advance to the next tier, a county must also meet additional health equity measures.

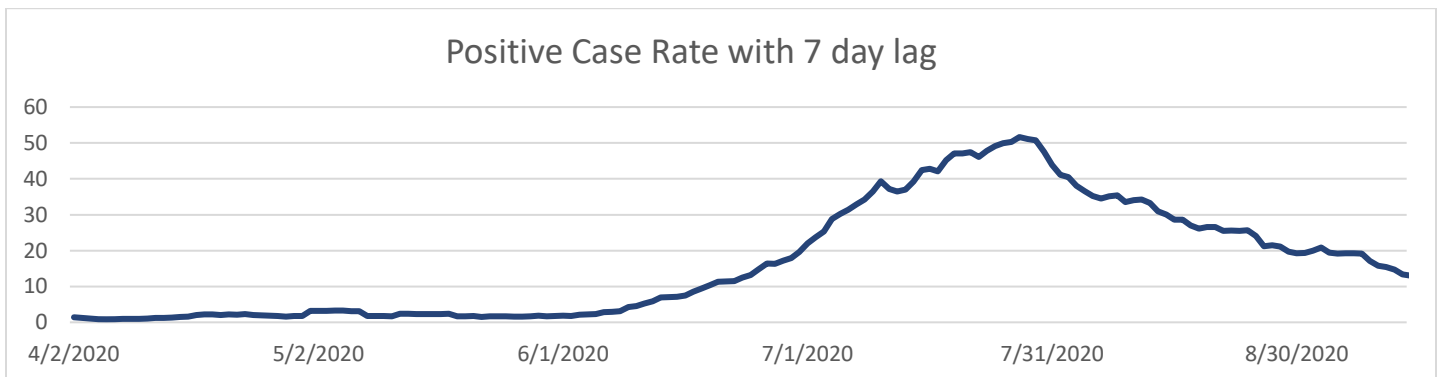

**Adjusted case rate will be determined using confirmed (by PCR) cases, and will not include state and federal inmate cases. Assignment of a case rate tier includes an adjustment factor for counties that are testing above the state average.

*** Excludes state and federal inmate cases.

The graph below shows testing positivity (percent of tests that are positive), 7-day average with 7 day lag, through the report week. This may vary from state measures above.

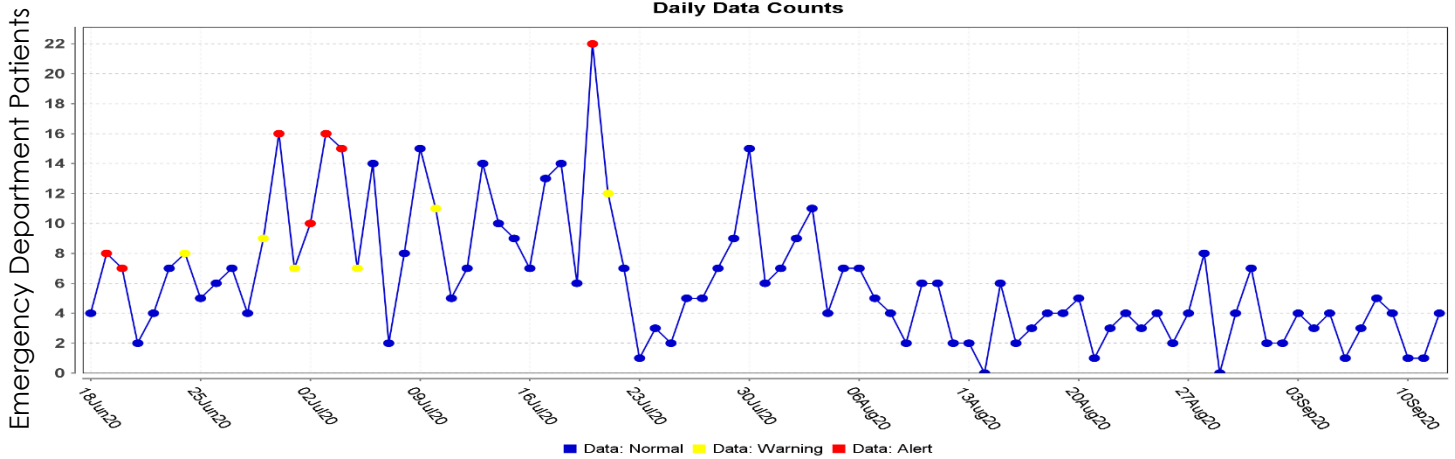

The graph below shows positive case rate (number of positive cases per 100,000 county population), 7-day average with 7 day lag, through the report week. This does not include the state adjustments and may vary from state measures above.

COMMUNITY MONITORING – VISITS IN EMERGENCY DEPARTMENTS

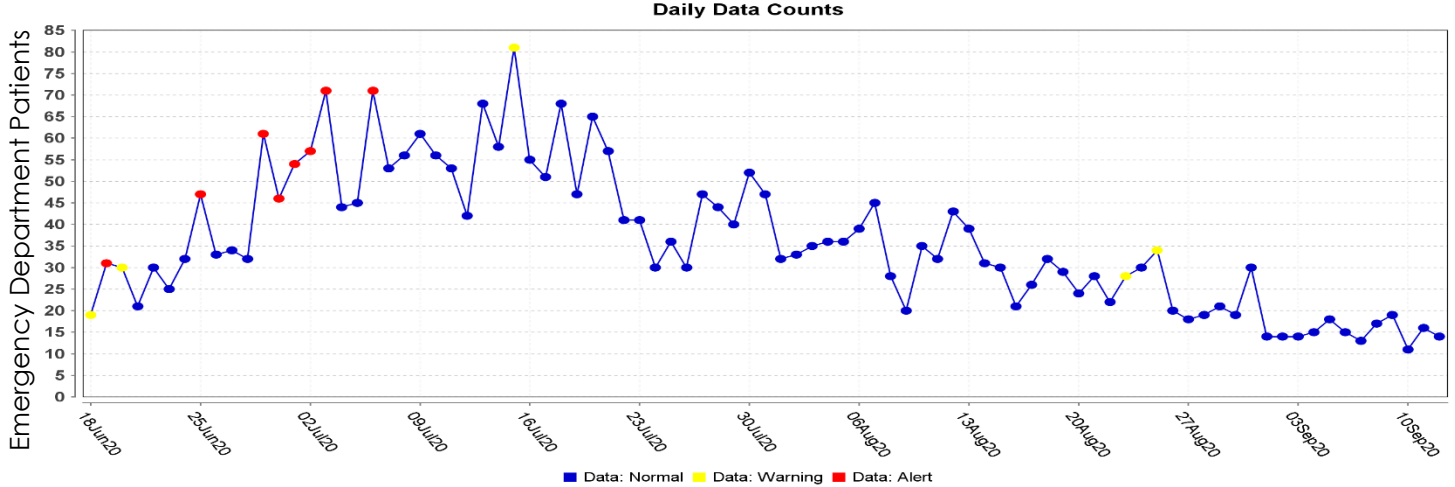

INFLUENZA LIKE ILLNESS

This graph shows the number of emergency room visits for Influenza-like illness complaints for all Stanislaus County Hospitals.

COVID-19 LIKE ILLNESS

This graph shows the number of emergency room visits for COVID-19-like illness for all Stanislaus County Hospitals.

Mountain Valley EMS COVID-19 Responses

This graph shows the ambulance calls (blue) for COVID-19 related situations compared to the threshold of concern (red).
